

One Mission. One Platform. One Process.

Validation Workflow Automation for Regulated Systems

At BTR, our mission is to help reduce risk to patients by transforming how the life sciences industry manages compliance of regulated technology solutions. Computer System Validation (CSV) hasn't changed in over two decades and that's why it is our singular vision to make CSV paperless, seamless, and stressless.

Today, leading life sciences, medical device and software development organizations rely on our Res_Q™ Validation Lifecycle Management System (VLMS) as their trusted validation workflow automation platform. It's their single source of validation truth to release more products to users, accelerate implementation, and ensure compliance across the enterprise.

Res_Q VLMS: Built by Validation Experts for Validation Experts

We've been there. We know compliant validation is hard work. That's why we've built the platform we wish we always had. Res_Q VLMS features pre-built Compliance Modules for intelligent workflow automation, structured risk assessments, and automated testing for more than 30 systems across the life sciences ecosystem. We partner closely with you every step of the way to help you accelerate compliance and deliver speed to users across the enterprise.

OVERVIEW

Speed Matters. RES_Q Delivers.

Equip your teams to accelerate software validation, improve efficiency & save money.

80%
reduction in time
spent validating

60%
less cost in
maintenance

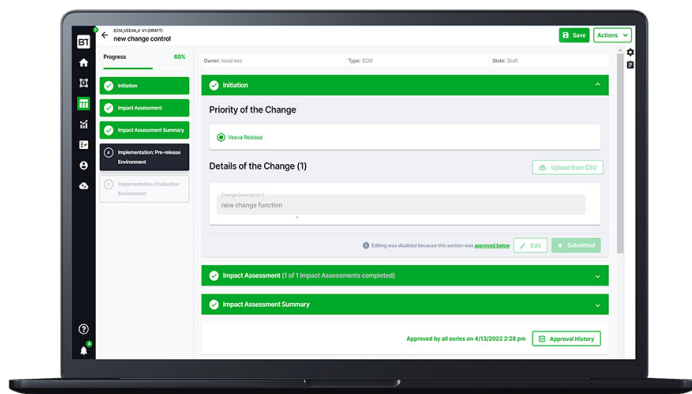

Validation has always been a time-consuming and disconnected process throughout our organization. With Res_Q we're able to manage releases of multiple systems across our enterprise with ease—enabling us to maintain compliance overall.

– Leading Pharma Manufacturer

AUTOMATE. VALIDATE. ELEVATE.

Trusted by top-tier life sciences
leaders and innovative startups alike

275+

Companies Moved to
the Regulated Cloud

Discover Res_Q VLMS. A Simply Better Way to Validate.

Res_Q eliminates manual, paper processes and disparate workflows to empower compliance teams to become more efficient. Through intelligent workflow automation, built-in templates, test scripts, and compliance modules, Res_Q layers into existing regulated platforms like OKTA, Veeva, DocuSign, NetSuite, Nuvoilo, and much more.

The Result? BTR customers implement validation up to 30% faster.

Put Your Validation on the Launch Pad to Productivity

BTR has partnered with more than 275 life sciences companies to make the move to the regulated cloud and Res_Q is the compliance engine of choice behind some of the world's leading software developers for regulated apps.
