

Res_Q Dashboards & Reporting

Make Smarter Decisions with Data-First Design

Tailored Dashboards Deliver Actionable Insights for Both Quality and IT Teams

For Quality Teams:

- Validation status tracking across all systems
- Documentation completeness and approval metrics
- **Top KPIs:**
 - Periodic review compliance
 - Deviation management status
 - Audit-ready documentation percentage

For IT Teams:

- System validation health metrics
- Release validation tracking and timeline adherence
- **Top KPIs:**
 - System validation status
 - Implementation timelines
 - Integration compliance metrics

Key Benefits

- ✓ **Real-time validation intelligence:** Access centralized dashboards showing metrics that truly impact operational excellence
- ✓ **End siloed reporting:** Eliminate disparate sources of truth with a unified data platform
- ✓ **Enhanced transparency & traceability:** Maintain continuous audit readiness with complete visibility

The Res_Q Difference

Built by validation experts who understand your challenges, Res_Q offers advanced visualization capabilities that static reporting solutions cannot match. Our data-driven architecture provides the meaningful insights needed to make informed decisions:

1. Start with executive-level compliance status
2. Drill down to systems approaching review deadlines
3. Examine specific documentation requiring attention
4. Track execution metrics and testing progress

See how Res_Q dashboards can be tailored to your business needs and transform your validation processes.
